JFO – Testsuite

RTF to XSL-FO conversion

Section breaks and columns

First section has one column. It's followed by section with three columns with same page settings. The section break type is continuous.

This section has three columns… This section has three columns… This section has three columns… This section has three columns… This section has three columns… This section has three columns… This section has three columns… This section has three columns… This section has three columns… This section has three columns… This section has three columns… This section has three columns… This section has three columns… This section has three columns… This section has three columns… This section

And here again one column! This feature is useful for headlines.

This section has three columns… This section has three columns… This section has three columns… This section has three columns… This section has three columns… This section has three columns… This section has three columns… This section has three columns… This section has three columns… This section has three columns… This section has three columns… This section has three columns… This section has three columns… This section has three columns… This section has three columns… This section has three columns…

This section has three columns… This section has three columns…

And here again one column! This feature is useful for headlines.

This section has three columns… This section has three columns… This section has three columns…
- column break -

This section has three columns… This section has three columns… This section has three columns… This section has three columns… This section has three columns… This section has three columns… This section has three columns… This section has three columns… This section has three columns… This section has three columns… This section has three columns… This section has three columns…

This section has three columns…

And here again one column! This feature is useful for headlines.

Let's start a new section on an even page (4).

This is page 4...

Page break on odd page
